

OVERALL WEIGHTED EVALUATION

Changes of Skin Color	Flat Scars	Faulty Scars	Changes to Form and Contours, Non-Cicatricial Alopecia
Area of color slightly different from neighboring skin, apparent at 50 cm but not very apparent at 3 m, total area is $< 10 \text{ cm}^2$ and/or area of color very different from neighboring skin, apparent at 3 m, total area is $< 2 \text{ cm}^2$	$\left. \begin{array}{l} \\ \end{array} \right\} 0.5$ Total length is $< 5 \text{ cm}$	$\left. \begin{array}{l} \\ \end{array} \right\} 0.5$ Linear scars, total length is $< 2 \text{ cm}$ and/or plaques, total area is $< 1 \text{ cm}^2$	$\left. \begin{array}{l} \\ \end{array} \right\} 0.5$ Slight disfigurement of 1 anatomical element*
Area of color slightly different from neighboring skin, apparent at 50 cm but not very apparent at 3 m, total area is $\geq 10 \text{ cm}^2$ and/or area of color very different from neighboring skin, apparent at 3 m, total area is $\geq 2 \text{ cm}^2$ but $< 5 \text{ cm}^2$	$\left. \begin{array}{l} \\ \end{array} \right\} 2$ Total length is $\geq 5 \text{ cm}$ but $< 20 \text{ cm}$	$\left. \begin{array}{l} \\ \end{array} \right\} 2$ Linear scars, total length is $\geq 2 \text{ cm}$ but $< 5 \text{ cm}$ and/or plaques, total area is $\geq 1 \text{ cm}^2$ but $< 3 \text{ cm}^2$	$\left. \begin{array}{l} \\ \end{array} \right\} 2$ Slight disfigurement of 2 or more anatomical elements* and/or moderate disfigurement of 1 anatomical element*
Area of color very different from neighboring skin, apparent at 3 m, total area is $\geq 5 \text{ cm}^2$ but $< 10 \text{ cm}^2$	$\left. \begin{array}{l} \\ \end{array} \right\} 7$ Total length is $\geq 20 \text{ cm}$	$\left. \begin{array}{l} \\ \end{array} \right\} 7$ Linear scars, total length is $\geq 5 \text{ cm}$ but $< 15 \text{ cm}$ and/or plaques, total area is $\geq 3 \text{ cm}^2$ but $< 10 \text{ cm}^2$	$\left. \begin{array}{l} \\ \end{array} \right\} 7$ Moderate disfigurement of 2 or more anatomical elements* and/or significant disfigurement of 1 anatomical element*
Area of color very different from neighboring skin, apparent at 3 m, total area is $\geq 10 \text{ cm}^2$	$\left. \begin{array}{l} \\ \end{array} \right\} 20$	$\left. \begin{array}{l} \\ \end{array} \right\} 20$ Linear scars, total length is $\geq 15 \text{ cm}$ and/or plaques, total area is $\geq 10 \text{ cm}^2$ but $< 25\%$ of the entire face	$\left. \begin{array}{l} \\ \end{array} \right\} 20$ Significant disfigurement of 2 or more anatomical elements*
		$\left. \begin{array}{l} \\ \end{array} \right\} 40$ Extensive and conspicuous scars, total area is $\geq 25\%$ but $< 50\%$ of the entire face	$\left. \begin{array}{l} \\ \end{array} \right\} 40$ Severe and unsightly disfigurement affecting approximately 50% of the face
		$\left. \begin{array}{l} \\ \end{array} \right\} 80$ Extensive and unsightly scars corresponding to disfigurement	$\left. \begin{array}{l} \\ \end{array} \right\} 80$ Deformation of almost the entire face corresponding to disfigurement
*Note: See point 7 of evaluation rules in this chapter for the list of anatomical elements to be evaluated.		Total Weighted Evaluation: _____ Points
