#### Notes:

— The limit of the biodiversity reserve shown on the plan accompanying the technical description was determined from the digital files in the Québec topographic and administrative database (BDTA) at a scale of 1:20,000 of the Ministère de l'Énergie et des Ressources naturelles du Québec, the digital compilation of surveys produced by the Ministère de l'Énergie et des Ressources naturelles du Québec, the data bank of the forest information system (SIEF) of the Ministère de l'Énergie et des Ressources naturelles du Québec, an excerpt of the Base de données cadastrale du Québec effective on 26 April 2017, an excerpt of the surveys officialized in the Registre du domaine de l'État effective on 26 April 2017, the mining right management system (Gestim) of the Ministère de l'Énergie et des Ressources naturelles du Québec and information from satellite images of the sectors concerned.

— The limits along the shore of the Decelles reservoir must be established at the geodesic elevation of 311 metres, that is, the maximum operating level.

— Generally, all the beds of watercourses, rivers and lakes are included in the biodiversity reserve. Only those excluded are mentioned in this technical description.

— The limits defined by the shore of a lake or the bank of a river or stream correspond to the high-water mark.

— The coordinates and areas used in this technical description are approximate. They were graphically determined from the said data used to determine the limit of the biodiversity reserve. They are given in metres in reference to the Québec plane coordinate system (SCOPQ), Modified Transverse Mercator projection (MTM), Time Zone 10 (central meridian 79°30'), North American Datum 1983 (NAD83).

— The measures comply with the International System of Units.

— The limit of the biodiversity reserve is based on the actual layout of the elements described in this document and must be legally interpreted in such a way. It was prepared by the Direction des aires protégées of the Ministère du Développement durable, de l'Environnement et de la Lutte contre les changements climatiques.

— The territory of the biodiversity reserve, as described in this technical description includes only the lands in the domain of the State. Any land that is not part of the domain of the State is excluded from the biodiversity reserve.

— The territory is represented on a plan at a scale of 1:25,000.

— In accordance with the instructions of the Direction des aires protégées, the information contained in the fundamental documents provided by the mandator, from which this technical description was prepared, is accepted as fact.

The whole as shown on the plan prepared by the undersigned on 8 February 2018 and filed with the office of the Surveyor-General of Québec of the Ministère de l'Énergie et des Ressources naturelles under document number 536700.

Prepared in Québec by Pierre Hains, land surveyor, on 8 February 2018, under number 11 503 of his minutes.
